

EVANSVILLE DAY SCHOOL

MEDICAL POLICIES

evansvilledayschool.org

Evansville Day School's medical policies were developed by the school administration and nurse, using resources from the Indiana Department of Education and Center for Disease Control guidelines.

SYMPTOMS

People with COVID-19 have a range of symptoms which may appear 2-14 days after exposure. The CDC list of symptoms include:

Fever of 100.4° (+), uncontrolled cough that causes difficulty breathing, severe headache, sore throat, loss of taste or smell, diarrhea, nausea or vomiting, and abdominal pain.

FEVER POLICY

Students are required to check their temperature daily before coming to school. Temperatures of 100.4° (+) must stay home.

EDS staff will check temperatures at drop-off in Levels 2-3 protocols.

Students must be fever-free for a minimum of 24 hours without the use of acetaminophen or ibuprofen before returning to school.

DISMISSAL

Students with a 100.4° (+) fever will be immediately sent home from school.

Students exhibiting one or more COVID-19 symptoms but no fever will be immediately isolated on campus. The nurse will contact parent(s) for consultation but will have final authority whether or not to send a fever-free student home from school.

SAFE RETURN

Students who have NOT been tested for COVID-19 may return to school when ALL criteria are met:

1. Have been fever-free for 24 hours without the use of acetaminophen or ibuprofen;
2. Physician clears student to return (e.g. non-COVID-19 diagnosis), OR at least ten days have passed since symptoms first appeared.

Students who test POSITIVE for COVID-19 may return to school when ALL criteria are met:

1. Have been fever-free for 24 hours without the use of acetaminophen or ibuprofen;
2. At least ten days have passed since symptoms first appeared;
3. Symptoms have improved or resolved.

Students who test NEGATIVE for COVID-19 but displayed symptoms may return to school when ALL criteria are met:

1. Have been fever-free for 24 hours without the use of acetaminophen or ibuprofen;
2. Symptoms have improved or resolved;
3. Can document negative test.
